

Setup and Takedown of Goals Guidelines

Set up:

- If you are the first game of the day arrive early and set up the goals for your field.
- The goals and black rolling boxes will be setting outside the connex box by the snack bar
- When setting up the goals, there are stakes in the black age group box that are to be used on the metal of the goals.
- The stakes are **not** for the nets.
- There are 4 stakes for each goal. One for the front and rear of each of the side goal triangles. These are a must.
- The stakes are very important. There are accidents that involve goals being pulled over and the weight of the goal crashing down on can injure players, coaches and bystanders.

Take down:

- If you are the last game of your age group of the day break down your goals and take them to the connex box; the goal post materials can be leaned against the connex box.
- Place the nets back in the red bags inside the black age group box.
- Be sure to gather the stakes and put them in the black age group box.
- Don't forget the corner flags.
- Clean up the field of any trash or debris

Thank you very much for your hard work and dedication to our young soccer players! All of this is made possible by all our volunteer coaches and parents time and commitment. You rock!
